Solution Architect & Implementation Specialist

Solution-oriented implementation & integration specialist and former educator with experience leading customer discovery, enterprise implementations, stakeholder alignment, architecture & system design, and technical leadership of professional services teams.

CORE COMPETENCIES

- **Collaboration** Technical Discovery • Solution Design • Cross-Functional Leadership
- **Implementation & Integrations** API Integrations • CRM / ERP • SSO • IAM • Data Migration
- **Architecture & Engineering** Node • Typescript • React • AWS • Docker

SELECTED IMPLEMENTATION & INTEGRATION LEADERSHIP

- Led enterprise SaaS integrations with PepsiCo's CRM and Jack Link's ERP while at an e-commerce startup
- Owned 60%+ of new customer data migrations and SSO implementations at a higher education SaaS startup
- Designed solutions for enterprise clients including configurable promotion workflows, back-in-stock notifications, and bespoke product catalog and merchandising implementations

PROFESSIONAL EXPERIENCE

Freelance Technical Consultant | Remote

2024 - Present

Web Developer / Consultant

- Built multilingual CMS-driven e-commerce site for Ecuadorian organization, improving publishing workflows, operational efficiency, and member management & engagement
- Designed modular low-code application framework for early-stage accounting startup (AWS, OpenAI, Docker, PostgreSQL), enabling rapid API and workflow builds with AI & webhook capabilities
- Advised \$6M seed-funded ag-tech startup leadership on ERP, CRM, and IAM integration strategy supporting go-to-market execution

Housing.Cloud | Remote | Higher Ed-tech

2023 - 2024

Solution Engineer

- Conducted technical discovery sessions with university administrators to align platform configuration with campus requirements
- Deployed SSO integrations in coordination with university IT teams, improving security and compliance
- Implemented customer service platform (Zendesk with Slack integrations) leading to universal adoption by new clients and more effective resolution of client issues & queries
- Led ETL processes for 60%+ of new client data migrations across multiple environments, ensuring reliable imports, QA validation, and deployment

Formative (Acquired by Newsela) | Remote | K-12 Ed-tech

2022

Senior Full Stack Engineer

- Improved educator efficiency and student learning outcomes by enhancing auto-grading capabilities (Node, React, GraphQL)
- Automated large-scale ingestion of third-party educational content (Node.js, MongoDB, XML) to the platform

LeapYear Technologies (Acquired by Snowflake) | Berkeley, CA | Data Privacy & Security

2019 - 2021

Software Engineer

- Built administrative dashboards for managing data sources, user directories, and access controls in regulated fintech environments
- Consolidated microservices into unified GraphQL API (NestJS, Apollo), improving performance and maintainability

Symphony Commerce (Acquired by Quantum Retail) | San Francisco, CA | E-commerce CMS, SaaS, B2B

Team Lead, Professional Services

2018 - 2019

Senior Professional Services Engineer

2015 - 2018

- Partnered with PepsiCo senior IT leadership to design and implement CRM integrations supporting customer data, order history, abandoned cart recovery, and promotional engagement workflows, improving visibility into customer behavior across commerce channels
- Led design and implementation of ERP and EDI integrations for Jack Link's, partnering with marketing and operations leadership to enable shipment visibility, fulfillment automation, and product traceability requirements including lot-code tracking and recall readiness
- Managed a globally distributed team while maintaining ownership of customer architecture and delivery
- Designed customer experience capabilities including back-in-stock notifications and configurable promotional workflows, enabling brands to improve engagement and conversion
- Developed bespoke product catalog and merchandising solutions for fashion brands, aligning technical implementation with unique business and customer experience requirements

Learnable Prep | Orlando, FL

Founder, Curriculum Designer, Instructor

2010-2015

- Designed and taught Math & English test prep programs (SAT, ACT, GMAT) leading to measurable gains for hundreds of high school and university students

Total Literacy Academy | Bangkok, Thailand

Lead English Teacher, Teacher Trainer

2008-2010

- Led English instruction for secondary school students & business English for Thai professionals
- Mentored new teachers and led a multicultural team of academic professionals

EDUCATION & CERTIFICATIONS

Product Manager Certification - Product School

Advanced Software Engineering Immersive - Hack Reactor

B.S. Biology, Minor in Business (*magna cum laude*) - University of Florida
